NEWS RELEASE

December 5, 2006 TSX-V Trading Symbol: **ASX** OTC BB Trading Symbol: **ASXSF**

ALBERTA STAR APPOINTS SGS LAKEFIELD FOR METALLURGICAL PROCESSING AND TESTING OF ELDORADO SILVER & URANIUM TAILINGS

Alberta Star Development Corp., (the "Company") listed on the TSX Venture Exchange (ASX) and on the OTCBB (ASXSF), is pleased to announce that the Company has appointed SGS Lakefield Research Ltd. ("SGS"), to conduct mineral processing and metallurgical testing of silver & uranium tailings collected by the Company during the summer of 2006 from the Eldorado & Echo Bay silver and uranium mines. The SGS report is expected to include an investigation of the mineralogical properties, physical characterization, tailings composite, and an assessment of the leachability of the tailings to determine the potential recovery of uranium, silver, cobalt, nickel and copper. Uranium leaching will establish if the uranium values are economically leachable using conventional oxidative atmospheric acid leaching at ambient temperature. SGS is an ISO-accredited Canadian based research facility in Lakefield, Ontario that has extensive experience in mineral processing and metallurgical testing of base, precious metals and uranium.

The Company completed over the summer of 2006 a preliminary sampling program of the uranium-silver mine tailings and waste dumps. As a result of the sampling program, the Company has begun preparation for a delineation drill program of the un-mined areas and extensions of the Eldorado & Echo Bay silver and uranium mines and to determine if there is a potential resource to support the recommencement of commercial production at the mine sites.

The Company intends to continue to rapidly advance its uranium exploration and drilling activities in 2007 and continue with the development of its uranium assets in the Eldorado & Contact Lake uranium districts.

THE ELDORADO URANIUM MINE - ELDORADO URANIUM DISTRICT

The Eldorado Uranium Mine formerly mined and produced 15 million pounds of uranium at an average head grade of 0.75% U₃0₈ and 8 million ounces of silver plus, copper, nickel, radium, polonium and lead at the Eldorado - Port Radium area commencing in 1933. The Eldorado Mine has approximately 25 miles of existing underground workings developed on fourteen levels and was formerly one of Canada's principal producers of high grade uranium pitchblende concentrates from the 1930's to 1960's. The Echo Bay mine produced over 23,779,178 million ounces of silver at an average head grade of approximately 66 ounces per ton prior to its closure in 1982.

The Company has assembled an experienced IOCG & uranium technical team with advanced uranium exploration expertise, who view the Eldorado & Contact Lake district as having the potential to host both Olympic Dam and volcanic hosted styles of copper, gold, and uranium deposits. The current December 5, 2006 spot price for uranium provided by the The Ux Consulting Company LLC (www.uxc.com) is now \$63.00 US per pound

ALBERTA STAR DEVELOPMENT CORP.

Alberta Star Development Corp. is a Canadian mineral exploration company that identifies, acquires, finances advanced stage mineral exploration projects in Canada. The Company is committed to creating long term shareholder value through the discovery of base and precious metals and uranium.

The TSX Venture Exchange does not accept responsibility for the adequacy or accuracy of this News Release.

This news release contains certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical fact, that address future production, reserve potential, exploration drilling, exploitation activities and events or developments that the Company expects to occur, are forward looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans" "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Information inferred from the interpretation of drilling results and information concerning mineral resource estimates may also be deemed to be forward looking statements, as it constitutes a prediction of what might be found to be present when and if a project is actually developed. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. The Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or

other factors, should change. For further information investors should review the Company's filings that are available at www.sedar.com or contact Tim Coupland, President at (604) 681-3131.
